Technical Skills

About

- Unique skill to read and understand production logs. Real production experience with troubleshooting using tools like splunk, aws cloudwatch logs, azure monitoring insights, resolving issues, designing and implementing dashboards, alerts.
- Development of backend services. Experience with services from prototype stage to high load IoT with millions of production users and mission critical IoT services.
- Understanding the principles of design, CSS, HTTP protocol, cookies, headers, certificates, WebSockets, JS, tooling like postman, browser dev tools, figma, collaboration with designer skills. My deep understanding of CSS helped to build development and delivery process for web UI.
- Love splunk, powershell, outer apply and flexboxes.
